NOTES

- Return to service dates are a best estimate and are subject to change. Dates are provided to the same accuracy as provided to National Grid under OC2 requirements of the Grid Code.
- The Damhead CCGT comprises two gas turbines and a single steam turbine.
- Rye House CCGT comprises three gas turbines and a single steam turbine.
- Shoreham CCGT comprises a single gas turbine and a single steam turbine.
- ScottishPower has a number of electricity customers with over 600GWh annual demand. These customers have long term supply contracts which are subject to a tendering process at relevant intervals. Hedging of these contracts will be undertaken when required.
- Plant output is subject to Transmission Entry Capacity (TEC) which in 2012/13 is 2284MW at Longannet, 551MW at Cockenzie, 440MW at Cruachan, 715MW at Rye House, 805MW at Damhead, and 420MW at Shoreham.
